

PREMIUM ALKALINE & MINERAL DRINKING WATER

Drink the ZOR of Purity

ABOUT ZORALO

At ZORALO, we believe that every drop of water should deliver exceptional purity, refreshing taste, and uncompromising quality. Manufactured by KNC Industries, ZORALO combines advanced purification technology with carefully balanced minerals to provide safe, hygienic, and refreshing drinking water for homes, businesses, hospitals, and industries.

Our modern manufacturing facility follows stringent quality standards to ensure every bottle meets customer expectations for purity, consistency, and reliability.

Whether you choose Alkaline Water or Mineral Water, ZORALO delivers freshness you can trust every day.

Why Thousands Will Choose ZORALO

- ✓ Multi-Stage Purification
- ✓ RO Technology
- ✓ UV Sterilization
- ✓ Ozone Disinfection
- ✓ Mineral Enrichment
- ✓ Balanced Alkaline pH
- ✓ Hygienic Bottling
- ✓ Premium Food Grade Packaging
- ✓ Laboratory Tested
- ✓ Manufactured by KNC Industries

Advanced Water Purification Process

STAGE 01

Source Water Collection

Every bottle of ZORALO begins with carefully selected source water, which undergoes comprehensive preliminary inspection before entering our purification facility. This ensures that only suitable water proceeds to the next stage of treatment.

STAGE 02

Advanced Multi-Stage Filtration

The water passes through multi-media filtration, activated carbon filtration, and high-performance reverse osmosis membranes to remove suspended particles, impurities, dissolved solids, and unwanted contaminants while maintaining exceptional clarity.

STAGE 03

Purification & Disinfection

State-of-the-art UV sterilization and ozone disinfection technologies eliminate microorganisms and help maintain hygienic processing standards throughout the purification cycle without compromising water quality.

STAGE 04

Mineral & Alkaline Enhancement

Essential minerals are carefully balanced to achieve a refreshing taste, while the alkaline enhancement process helps maintain an optimal pH range, creating premium drinking water suitable for everyday hydration.

STAGE 05

Quality Assurance

Every production batch undergoes comprehensive laboratory testing, including pH verification, TDS analysis, microbiological testing, and multiple quality inspections to ensure compliance with stringent quality standards.

STAGE 06

Hygienic Bottling & Distribution

The purified water is automatically filled into food-grade bottles using fully hygienic bottling systems, sealed, inspected, and prepared for safe distribution while preserving freshness and product integrity.

TWO FORMS OF PURE WATER

Choose the refreshing balance of ZORALO Alkaline Water or the clean, mineral-balanced quality of ZORALO Mineral Water.

ZORALO Alkaline Water

pH 8.0–9.5

Multi-stage purified

Mineral balanced

Refreshing taste

ZORALO Mineral Water

BIS 14543 Compliant

TDS 50–150 ppm

Naturally balanced minerals

Crystal clear quality

Precise Purification. Trusted Quality.
